"We make technology enhance any life-style, simply and reliably."

Michael A. Wohl, Founder

TECHNOLOGY. EXPERIENCE. DESIGN

Media Design Associates has built its entire business around these ideals. One of our specialties is making sure technology is never obtrusive—but a comfortable, natural extension of the way you live.

MDA designs and installs state-of-the-art home theater, multi-room audio/video, lighting control, automation, and communications systems for fine homes, offices, yachts, and aircraft. Working closely with architects, interior designers, builders, and homeowners, we provide easy-to-use, reliable, and aesthetically pleasing custom systems for entertainment, comfort, convenience, and security. All of our solutions are custom designed to meet your needs today and expand into the future.

MDA integrates technology into your environment and your life-style—be it on land, on the sea, or in the air.

As pioneers and innovators in this industry, we understand the technology. We know how to put it together to enhance and simplify your life. Most important, we know how to use design to make technology a comfortable, natural extension of the way you live.

Not surprisingly, few companies can match our experience and track record—anywhere in the world.

"My clients demand the best, and Media Design Associates delivers.....time after time."

—Mark Pulte, Mark Timothy Luxury Homes

"If you dream it, Media Design can create, build and install it"

— Mark Templeton, CEO Citrix Systems

THEATER IN THE HOME

Not long ago, home theaters were poor substitutes for the real thing. Boy, have times changed! Now, even a modest home theater can faithfully re-create the visual splendor and sonic impact you experience in a commercial theater.

An MDA home theater can blend seamlessly into an existing living space. Or it can be a dedicated environment, complete with theater seating, special lighting, acoustical treatments, and the genuine look and feel of a movie theater.

And it can be anything in between.

Flat-screen plasma and LCD TVs, as well as compact video projectors, make it easier than ever to enjoy a theater experience without compromising your decor. Discreet in-wall and on-wall speaker systems blend into the design and architecture of a room. And simplified remote controls—set up specifically for you—provide one-touch activation of your entire theater system, from the initial dimming of the lights to the roll-up of the screen at show's end.

Whatever your needs, whatever your pleasures, the beauty of our custom Home Theaters is that we design them to be everything you ever imagined, and more.

THE ART OF INTEGRATION, THE CONVENIENCE OF AUTOMATION

“Integration” is what good system design is all about, and it’s how MDA approaches every project. An integrated system centralizes the control of all of your equipment—audio/video, lighting, communications, heating and AC, security, pool and spa, sprinklers—so you can manage your home and your entertainment effortlessly.

Automation systems are designed to control virtually any electronic device in your home. *Touch* the “Entertain” button on a touch screen or keypad and set the perfect lighting atmosphere and room temperature for a party. *Touch* “Music” and distribute the sounds of your favorite artist throughout your home. Or crawl out of bed in the middle of the night and as soon as your feet *touch* the floor low-wattage lights illuminate a path to the bathroom. Five minutes later, they automatically dim out.

At Media Design, we can tailor a One-touch Automation system to match the way you live, work and relax. We make technology behave so that you enjoy the ultimate convenience and simplified control over your environment.

Ultimately, an MDA integrated system allows you to tap the power of the Internet for entertainment, information, home management, and security. We call this network-based automation, but our clients call it magic!

Whether it’s for entertainment, comfort, security, or business, Media Design believes technology—when aesthetically designed into your décor—will serve as a natural complement to your life-style and work-style.

We Do It All.

- Integrated Systems
- Home Theater
- Multi-Room Audio/Video
- Lighting Control
- Communications
- Security
- Network-Based Automation

"The folks at Media Design have made our life at sea as comfortable as home."

—Steve Earnest, Captain, M.Y. Janie II, 136' Motor Yacht
